

# ENSURE JUSTICE IS ACHIEVED

**COMMANDCENTRAL EVIDENCE**  
**DIGITAL EVIDENCE MANAGEMENT**

## MAXIMIZE THE VALUE OF YOUR DIGITAL EVIDENCE

Digital Evidence can be one of the most valuable tools when investigating and prosecuting cases. But the extreme volume, variety and velocity of data has made digital evidence management more complex for public safety agencies than ever before. This creates barriers for law enforcement professionals when collecting, storing, securing, managing, and sharing this critical information.

You need to make sure your case isn't put at risk by missing valuable content. There are, in fact, instances where cases that don't include digital evidence may not be prosecuted at all — and missing digital evidence can result in a lawsuit.

It's time to revolutionize digital evidence management.

CommandCentral Evidence includes all the tools you need to collect evidence from citizens, capture media on scene, and centralize digital evidence storage. With cloud, hybrid and on-premises deployments available, knock down the data silos in your operations with the ability to manage, view and securely share the entire case from a single location.

# ALL YOUR EVIDENCE IN ONE PLACE

## SOURCE-AGNOSTIC DIGITAL EVIDENCE MANAGEMENT

With the influx of digital content, the last thing you need is to overwhelm your records and evidence teams with more to manage. CommandCentral Evidence minimizes the burden of new media by providing access to all case content from a single pane of glass, so you get the most out of your digital evidence. Whether it's fixed surveillance, body-worn camera video, in-car video, crime scene images, 9-1-1 audio or radio traffic, it all needs to be reviewed and potentially shared to aid in prosecution. Ingest or access content from any source via native integrations to our own portfolio, 3rd party system connectors or manual file uploading.

### COMMUNITY INTERACTION TOOLS

Your community has valuable knowledge and can be a critical partner if you have the right tools to connect. Provide your citizens with the ability to share intelligence and be a true public safety partner with CommandCentral Community. These tools provide a secure way to collect evidence from the public, a safe place for anonymous tipping, and a channel to keep the public informed of local crime data — on your terms.

### FIELD RESPONSE APPLICATION

Capture images, video and audio on scene with an Android or iOS mobile device. With CommandCentral Capture, all evidentiary data is isolated from personal data, making it inaccessible for tampering by other apps. The chain of custody is established at the moment of capture, so you never need to subpoena devices. The evidence is then automatically uploaded to CommandCentral Evidence for immediate use. Officers can also dictate their primary narrative directly from the app, saving valuable time with automated transcription.

### IN-CAR AND BODY CAMERAS

Capture secure, unbiased video evidence with Motorola Solutions' robust body-worn and in-car cameras. Driving out of the way to upload recorded video is expensive and unproductive. Keep patrol officers on the road with automatic, encrypted video uploads from in-car systems or WiFi-enabled body cameras directly to CommandCentral Evidence. Once the evidence is uploaded, synchronize playback so recorded video and audio from multiple devices can be seen and heard simultaneously.

### MULTI-FILE ASSET UPLOAD

For multi-file evidence from physical media, the folder structure is just as important as the evidence itself. Maintain the integrity of the original evidence folder structure when you upload massive multi-file assets from physical media, such as DVDs, USBs and cellphones. This feature also saves on desktop storage, since it avoids uploading and downloading evidence as large zip files when needed for court. A security scan is run during the upload to protect against malware and other cyber threats.

### THIRD PARTY CONNECTORS

Our public safety software suite is natively integrated with CommandCentral Evidence, making it easier to gather all of the content you need. But, even if you don't leverage our applications, we also have a third party connector ecosystem that allows you to interface with the investments you've already made and maximize the value of the digital content they produce. We've interfaced with many vendors across the public safety technology landscape already, and can work with you and your vendors to get one built if needed.

# BUILD A STRONGER CASE

## INTEGRATED RECORDS AND EVIDENCE MANAGEMENT

If you're like most agencies, siloed systems make it challenging to pull together a complete picture of a case in a timely manner for investigations. CommandCentral Evidence uses intelligent case folders that automatically aggregate all case data, so your detectives can focus on solving the crime. By leveraging agency-configurable tags, file metadata and correlation with your CAD and RMS, content is easier to search, manage and review. This saves time and resources that can be put to use on more value-added tasks.

### COMMANDCENTRAL RECORDS

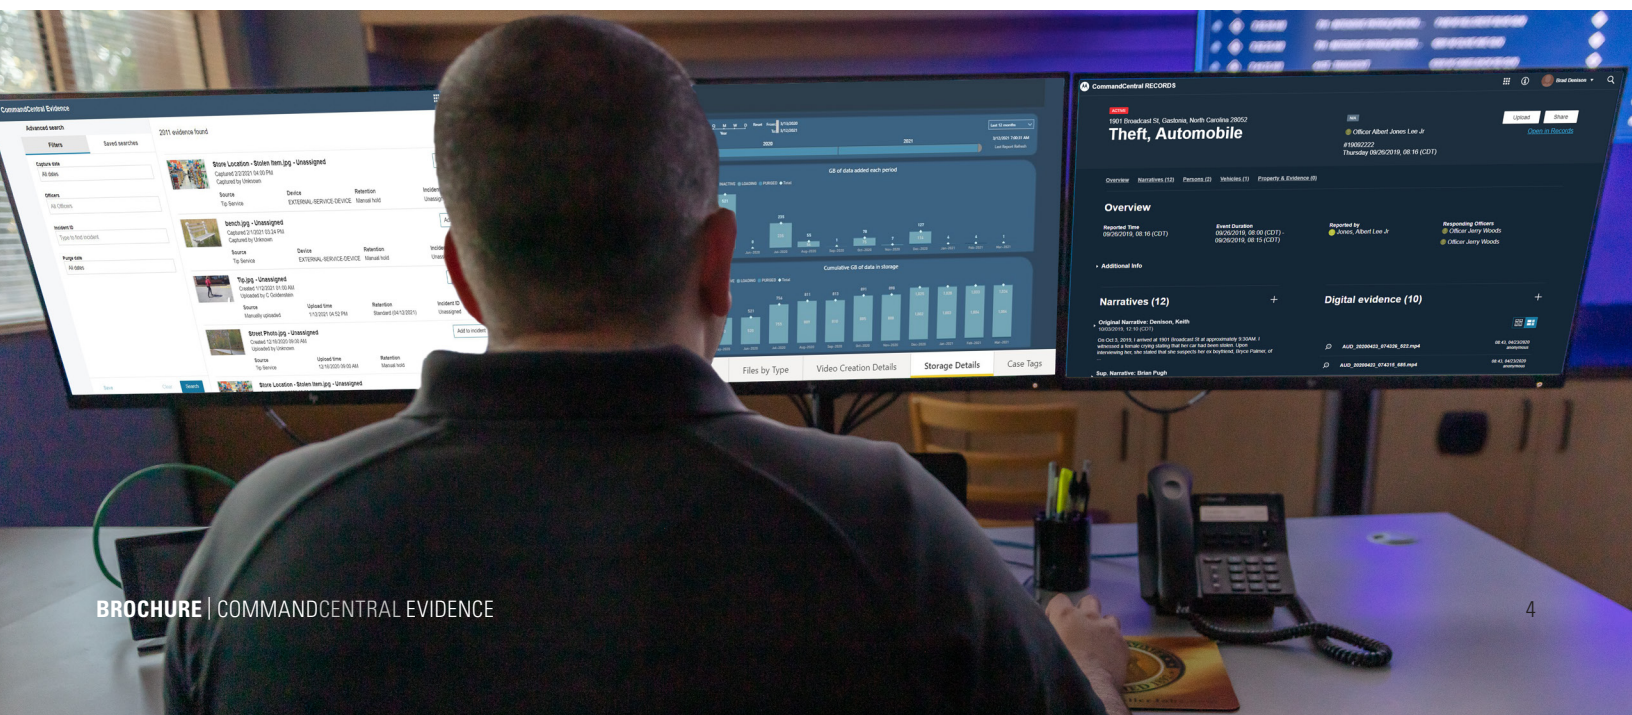

CommandCentral Evidence is completely integrated with CommandCentral Records, providing a more complete picture of the incident. The incident record automatically identifies links to existing person or vehicle records in the primary narrative, notifies you of license plate recognition database matches, and enables you to securely share the entire case from one location.

### PREMIERONE AND SPILLMAN FLEX RECORDS

View digital evidence directly from your existing on-premises PremierOne Records or Spillman Flex Records system via an integrated module, making it easier to access and review all case-related information from one user interface.

### THIRD PARTY CAD/RMS CORRELATION

Correlate digital evidence to your third party CAD/RMS system, taking content organization to another level. By leveraging metadata and applying tags to your content, you can automate the association of case-identifying details and minimize manual data input.

# GO TO COURT WITH CONFIDENCE

## SIMPLIFY JUDICIAL COLLABORATION

Successful prosecutions rely heavily on digital evidence. Collaboration with prosecutors, agency partners and the community must be seamless. Evidence must be shared in a timely manner and be fully tracked and audited. Perhaps most importantly, the chain of custody must be preserved. CommandCentral Evidence provides the tools to achieve the proper criminal outcomes and maintain transparency by securely sharing the case with the chain of custody intact.

### JUDICIAL SHARING

Quick, easy and secure sharing of case information with partners is critical. Keep partners up-to-date by providing them with an account for in-app sharing or access to a dedicated, streamlined page for prosecutors. This allows them to access all of the case content shared with them — even from multiple agencies — from one, secure location.

### AUDIT LOGGING

If content can't be authenticated and chain of custody kept unbroken, you risk your valuable evidence being dismissed. Detailed audit logging allows you to track all activity on or with a piece of content to ensure admissibility in court.

### DOWNLOAD MANAGER

You may already have case sharing systems in place with your partners. Easily download content and audit logs to review and share. This allows you to leverage your agency's existing investments, while still enjoying the benefits of CommandCentral Evidence.

### REDACTION SUITE

Freedom of information requests are a reality of the job, but it doesn't have to be inefficient. Our comprehensive redaction suite provides all the tools you need in one place to easily protect the privacy of those involved in an incident, while maintaining transparency to the public.

# STREAMLINE YOUR DIGITAL EVIDENCE WORKFLOW

## FROM CITIZEN TO COURTROOM

Knock down the data silos between your teams and tools with the confidence that every detail has been captured and no evidence left behind. From citizen to courtroom, intuitively collect, capture, manage and share all case content through one pane of glass that centralizes all evidence types for improved accuracy and collaboration.

### COMMUNITY ENGAGEMENT

Collect anonymous tips and gather digital evidence directly from citizens via a simple form or agency generated link.

### FIELD RESPONSE APPLICATION & VIDEO DEVICES

Capture images, video and audio on scene with a mobile device, in-car, or body camera.

### DIGITAL EVIDENCE MANAGEMENT

Aggregate and intelligently organize all digital evidence from a variety of systems in one place.

### RECORDS MANAGEMENT

Easily view all incident information within one, intelligently organized user interface, including the associated digital evidence.

### JUDICIAL SHARING

Securely share with prosecutors, other agencies and the community with chain of custody intact.

# TRANSFORM OPERATIONS WITH BIG DATA

You are faced with a ton of data — and it's only continuing to increase. It's structured and unstructured. It's coming in from so many different sources that it's easy to miss connections and trends. And no matter how much data you have, it won't be useful unless you can put it to work for your organization. Big data can be transformative to operations if it can be centralized and harnessed to fuel analytics.

## UNIFIED SEARCH

You need to be able to find what you need, fast. Our free-text search makes it easier to find the content you're looking for amongst the sea of images, audio, video, and other files. You can even filter and group based on tags and any other metadata attributes. Save frequent searches so they dynamically update with any new content.

## REPORTING

Dive deeper into your body camera program with built-in reports and dashboards. These reports provide insight into body camera usage and adoption, such as average video length and volume, policy compliance, officer behavioral changes and storage trends to help estimate future storage needs.

## MACHINE LEARNING

Officers dictate their narrative from CommandCentral Capture. The transcript becomes the primary narrative in CommandCentral Records, and machine learning automatically links any existing person, vehicle, organization or location records.

## SECURITY

Sensitive content may need to be restricted from certain users, or investigative groups might need to be alerted to review assets for particular cases. Simplify both of these processes by controlling who can access what with detailed permissions, and flagging or marking for-review content that requires special attention.

# COMMANDCENTRAL

The industry's most integrated public safety software suite from call to case closure.

## NEXT-GENERATION EVOLUTION WITH A DEDICATED TECHNOLOGY LEADER

We build software for mission-critical environments where every second matters. CommandCentral Evidence and other applications in our CommandCentral software suite unify data and streamline workflows from call to case closure in order to put your information to better use, improve safety for critical personnel and restore your focus on the communities you serve. Backed by a trusted, 90-year industry expert with proven public safety leadership, our suite is transforming the public safety experience with a focus on evolution, not revolution, in order to help you digitally transform your operation.
