

# TEAM COMMUNICATIONS

## YOUR GUIDE TO END-TO-END UNIFIED INDUSTRIAL COMMUNICATIONS

# POWERFUL ALONE. GAME CHANGING TOGETHER.

## EXPLORE TEAM COMMUNICATIONS, THE END-TO-END INDUSTRIAL COMMUNICATIONS SUITE

Whether you work in hospitality, manufacturing, transportation, or any other industrial workplace, your business relies on many disparate systems and technologies to get the job done – each with a unique role to play in the safety, productivity, and efficiency of your operations. Yet different devices, networks, and technology systems can keep business-critical information in silos. The result is limited communication and collaboration, delayed responses to issues, a heavier burden on your IT department, and a different vendor to manage for each solution.

Motorola Solutions has created an end-to-end industrial communications suite to break down the walls between your disparate technologies and systems. Instant and reliable two-way radios unified with broadband communications. Robust video security and analytics. Dynamic incident management and dispatch software. Private LTE to off-load your network data burden. And services to manage it all for you. All of these solutions are powerful alone, but when integrated together, they are game-changing for your business.

**Experience the end-to-end technology and integrations available to unify your teams, streamlining your communications, business-critical data, and security needs.**

# ON THE FRONTLINE

## SAFER WORK ENVIRONMENTS BEGIN WITH INSTANT COMMUNICATION

The backbone of unified Team Communications is instant push-to-talk provided by the MOTOTRBO™ digital two-way radio platform. MOTOTRBO connects staff and equipment to provide clear, secure and discreet communications. Ensure industrial workers on the frontline are geared-up with a rugged communications device, ready to provide always available, instant, push-to-talk communications.

### MOTOTRBO™ SYSTEMS

No matter how large or small your enterprise, MOTOTRBO offers a wide range of systems specifically designed for your business – for the days ahead and the years beyond. Your business will get the best of two-way radio with digital technology and experience increased capacity, enhanced features and exceptional voice quality.

### MOTOTRBO™ TWO-WAY RADIOS

Whether you're looking for an incredibly sleek, lightweight digital radio or a scalable portable that puts digital within reach, MOTOTRBO™ has a device to fit your needs. We have the most comprehensive portfolio of digital products and the industry's largest collection of data applications.

# AT DISPATCH

## SEAMLESSLY MOBILIZE YOUR WORKFORCE

Dispatch solutions are ready to help your team manage day-to-day activities more efficiently. The scalability of **Avtec Scout** makes it an ideal solution for businesses of all sizes. Avtec Scout eliminates the need for time-consuming task assignment and tracking. It gives your team the ability to create tasks, assign them to employees, and track their completion status in real-time. As a crucial piece of our end-to-end unified team communications solution, seamlessly integrate Scout with two-way radios solutions, broadband push-to-talk systems, and telephony technologies already in use.

**Avtec Scout™ Enterprise consoles** Discover the official dispatch solution for MOTOTRBO radio systems. Instantly connect to MOTOTRBO systems through either a wireline or wireless connection. Whether simple, highly complex, or somewhere in between, the Scout™ Dispatch solutions are customizable, scalable, proven, and reliable software-based IP communications for business-critical environments.

# DURING AN INCIDENT

## CAPTURE, ACT AND ANALYZE IN REAL-TIME

Whether you work in the Manufacturing, Transportation, Logistics, or in the Hospitality industry, your team can be subject to working in dangerous environments. With Ally give your team the ability to seamlessly document your incidents. But don't stop there, with incident management software your team can store all reports in a centralized database, and even create and access data from a mobile device, providing a much more proactive approach to security - available all within one end-to-end unified team communications ecosystem.

**Ally** is a single and intuitive dispatch and incident management platform designed to capture incident information in real time across multiple devices, analyze incident trends using easy, built-in reports, and act on improved insights for more proactive security planning.

# IN AND AROUND THE PERIMETER

## VIDEO SECURITY AND ACCESS CONTROL SOLUTIONS

For all businesses, video security is imperative when it comes to protecting your valuable assets, preventing theft, and increasing worker safety. When combined with powerful analytics, enterprises can search footage quickly and detect unusual activity in high-risk areas like a parking lot. Seamlessly integrate Access Control within your unified communications ecosystem and better secure your perimeter, receive alerts when restricted areas are accessed, and enforce permission within specific areas of the facility.

**Avigilon Video Security and Access Control** High-definition cameras give you unparalleled image detail, allowing your team to see incidents as they happen, minimizing response times and protecting your most valuable assets. Avigilon seamlessly integrates with existing security infrastructure. **Analytics - Avigilon Unusual Motion Detection (UMD)** brings a new level of automation to security, revealing events by continuously learning what typical activity in a scene looks like, and then detecting and flagging unusual motion. **Access Control Manager** protects people, property, and assets by allowing you to control access points virtually from anywhere.

**Radio Alert** enables your teams to receive and acknowledge Avigilon Video Security and Access Control intelligence all from their MOTOTRBO radios. With Radio Alert, alerts of activity happening in real-time on your site can be dispatched directly to two-way radios via text message or text-to-voice alerts. Now your security personnel can be instantly in the know - all without monitoring activity on a desktop screen.

SECURE YOUR BUSINESS WITH AVIGILON | >

# WHEN THE UNPREDICTABLE HAPPENS

## COMMUNICATE WITH CONFIDENCE

As your end-to-end communications platform advances, so can the complexity of your devices and networks. Supporting your unified communications from end-to-end doesn't have to be a burden. With Managed and Support Services from Motorola Solutions, you can rely on the experts in voice and data communications to manage this complexity for you. When you don't have to focus on the management of your communications platform you are free to always remain focused on the needs and growth of your business.

### INFRASTRUCTURE SERVICES

Minimize service disruptions and ensure the continuity of your communications network. Get access to technical support when and where you need it, so you can maintain and restore your system whenever an unexpected event or outage occurs.

### DEVICE SERVICES

Ensure peak performance of your radios with software updates, premium features and hardware repair services. Rely on the two-way radio experts at Motorola Solutions to monitor and update your devices, all while providing improved response and continuity.

# ACROSS YOUR LARGEST CAMPUSES

## BOOST YOUR NETWORK WITH CITIZENS BROADBAND RADIO SERVICE (CBRS)

No matter the size of your business or the type of environment you work in, chances are WIFI has become an invaluable tool for your business-critical operations. But as the number of devices, applications, and users continues to grow with your business, the weakness and limitations of your WIFI network are becoming more exposed. Now you can integrate Citizens Broadband Radio Service (CBRS) within your single end-to-end team communications ecosystem. WIFI may not have been built to support the influx of data your team needs to get the job done, but CBRS was.

### NITRO

Experience a first with Nitro, the first fully-managed CBRS platform that combines private broadband data with business-critical voice. With twice the capacity and up to four times the range of Wi-Fi, Nitro gives your unified team communications ecosystem a mighty boost and lets you do more with less.

# TEAM COMMUNICATIONS CONNECTS YOUR BUSINESS-CRITICAL LIFELINE: MORE THAN EVER BEFORE

Team communications is the only end-to-end industrial communications suite built with your business-critical needs in mind. When your business is powered by a technology ecosystem that unifies voice, video, data, and analytics, you'll be able to push your business's productivity and safety beyond where it has ever been before.

As our world continues to become more data driven, ensure with Team Communications from Motorola Solutions that this flood of data is unified and made accessible to those workers who truly need it. Every individual piece of our unified team communications ecosystem is **powerful**, from land mobile radio, to broadband push-to-talk, to video. But when you allow each piece to work together as one, end-to-end communications ecosystem, you've truly **changed the game** for your business.
